

Nunavik Research Centre

The Nunavik Research Centre is operated by the Resource Development Department of Makivik Corporation in Kuujjuaq, Nunavik. The Centre employs two biologist (fisheries and large mammals), a toxicologist, parasitologist and three wildlife technicians. Research is undertaken on the quality of country foods, environmental studies and wildlife management. Facilities include a wet lab, an analytical and pathology lab as well as a well-equipped mapping centre and library.
