

Ittaq Heritage and Research Centre

Ittaq specializes in Inuit design and leadership of heritage, media, and research activities in the community and surrounding areas of Clyde River, Nunavut. We work with Elders, youth, and local experts, as well as visiting professionals, to carry out high-quality projects that benefit our community and other Nunavummiut. We offer a broad range of expertise and services to support heritage, media, and research activities through our strong relationships in the community and resources found at our building and media centre.

Ittaq Heritage and Research Centre, Clyde River, Nunavut with Ittaq committee members and staff, 2015
